WORK EXPERIENCE

WebMechanic
2005 - Present

Web Developer

Hybrid freelance web designer, front end developer and UX advisor. Skilled in revamping existing sites, implementing designs from PSD's, and building new sites from scratch.

Baseball Info Solutions
2015 - 2017

Research and Development Engineer

Part of a small team responsible for creating a new program and website to parse daily industry information from multiple data points and sources.

- Developed and deployed MS SQL code, stored procedures, views, functions, triggers and jobs.
- Built SSIS packages to extract, transform and load data to multiple databases.
- Created and automated SSRS reports.

liQuidprint
1996 - 2015

Senior Front End Web Developer & Team lead

- Grew company from a two man operation into one of Chicago's most successful web design firms with 25+ employees.
- Built hand-coded, custom web solutions for large and small clients using many different technologies and code platforms including ColdFusion / PHP / ASP.NET.
- Full Stack knowledge of all aspects of the web development process, including sales, requirements gathering, documentation, project management, site maps, wireframes, design, development, testing, launch / post-launch procedures, and SVN source control.
- Designed static HTML / CSS / JQuery and converted files to templates for numerous CMS solutions including WordPress, Umbraco, Joomla, and ASP.NET.
- Created processes and standardized workflows which helped raise the level of efficiency and effectiveness within the organization, including helping the company adopt many agile methodologies.
- Responsible for maintenance of numerous ColdFusion / PHP / ASP.NET applications.
- Interviewed, on-boarded, and mentored junior developers.

The Court Grill
1995 - 1996

Restaurant Owner Operator

Created a new 100 seat restaurant. Managed daily operation including staff of 25, as well as accounting, marketing, and day-to-day operations. Controlled food/beverage to minimize food costs and maximize profit margin. Created marketing strategies to track existing and new customers.

University of Chicago
1993 - 1995

Special Project Manager - Telecommunications

Managed a university-wide initiative adding networking connections to all points across university buildings, hospitals and student housing.   Created a detailed work plan, including site maps, timelines and milestones to manage the project and finish the project early.

University of Chicago
1991 - 1993

Manager – Computer Store Warehouse

Responsible for all day-to-day operations, vendor sourcing, procurement of growing hardware and software sales.   Created new inventory control procedures to fix accounting deficiencies.

The Medici on 57th
1988 - 1991

General Manager – Restaurant

Managed all day-to-day operations including management of staff, purchasing and inventory control. Developed and revised kitchen procedures and layout to optimize workflow.
